

Distribution in Pounds w/top 20 Agency Breakout

- The top 20 Agencies distributed between 53% and 62% of the pounds from FY20 to FY23.
- In FY24 we project that the top 20 will distribute 56% or about 10.5 million pounds (of a network total of 18.6 million).
- Projecting FY25 using some of the remaining surplus to cover food acquisition we are projecting distribution of about 15.7 million pounds.

We have not only increased our distribution in pounds, but we have also improved the food we are distributing making it more culturally relevant, as well as healthier.
